

Functional Test - Module 6-7: About Us

Project: Blue Team — Moffat Bay Marina

Course: CSD 460 - Capstone Project

Description: Functional test plan for the About Us page, including page content, navigation, responsiveness, and public access.

Date: 2026/09/09

Front End Developer: Miguel Fernandez

Back End Developer: Sara White

Developer Tester: Carolina Rodriguez

Peer Tester: Robert Breutzmann

To complete the test case plan, fill out the information for Project, Course, Description and Date in the header above.

Table of Contents

- [Cover Page](#)
- [Test 1: About Us Page Loads and Displays Correctly](#)
- [Test 2: About Us Navigation](#)
- [Test 3: About Us Page Has Public Access](#)
- [Test 4: About Us Content Accuracy](#)
- [Additional Notes](#)

For each test, the developer should: provide a test description, a test objective, the developer name and date tested. For each step, fill out the actions to be taken and describe the expected results, and check Pass or Fail. The peer tester should provide their name, date tested, check Pass or Fail for each step, and fill out the Screenshots list below the table with the matching screenshot number for each item.

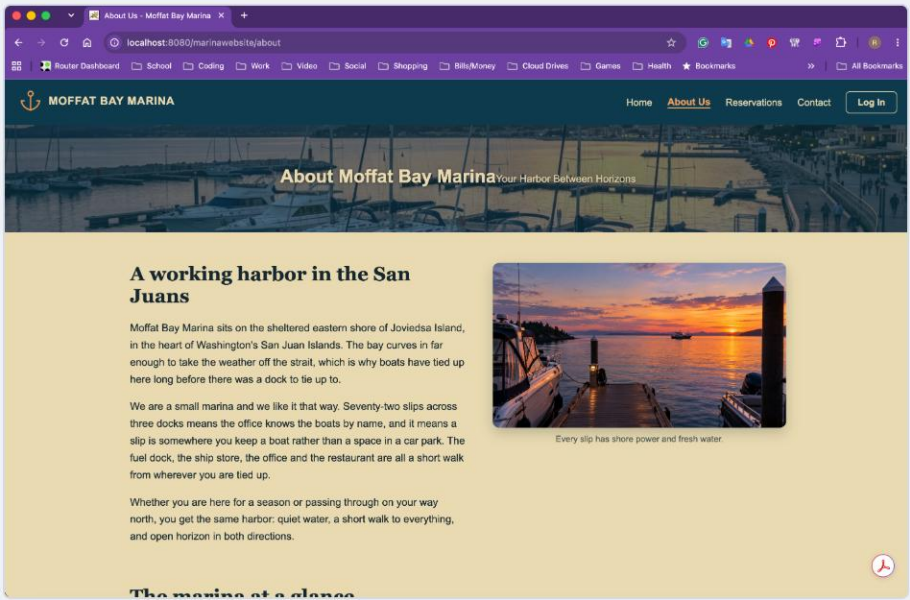

Test 1: About Us Page Loads and Displays Correctly

Test Objective: Verify the About Us page loads correctly and displays all expected content

DEVELOPER: Carolina Rodriguez | TESTED ON: Sept 10,2026

PEER TESTER: Robert Breutzmann | TESTED ON: 09/12/26

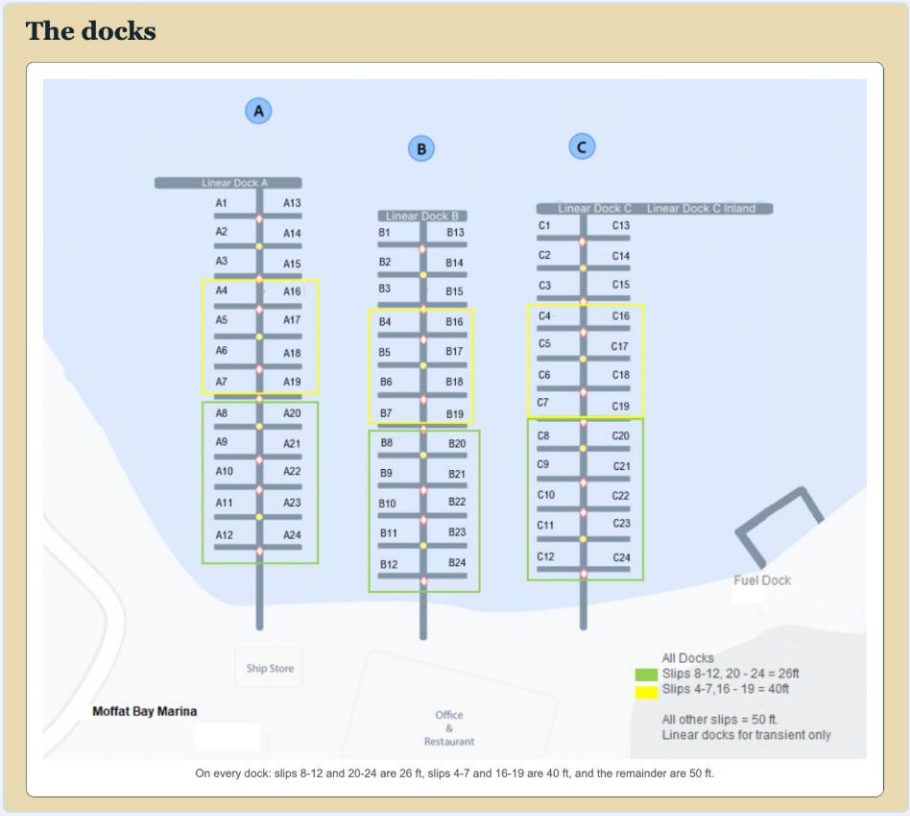

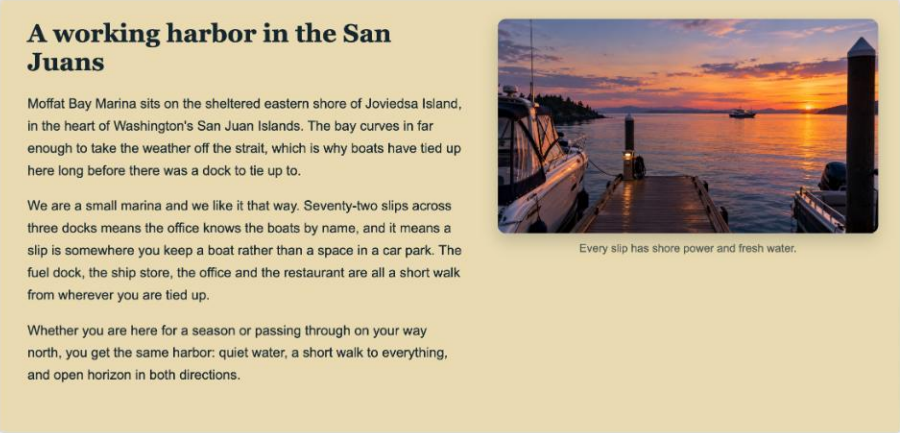

Step	Action	Expected Results	Dev Test	Peer Test
1	Open the About Us page from the website navigation.	The About Us page loads without errors.	Pass	Pass

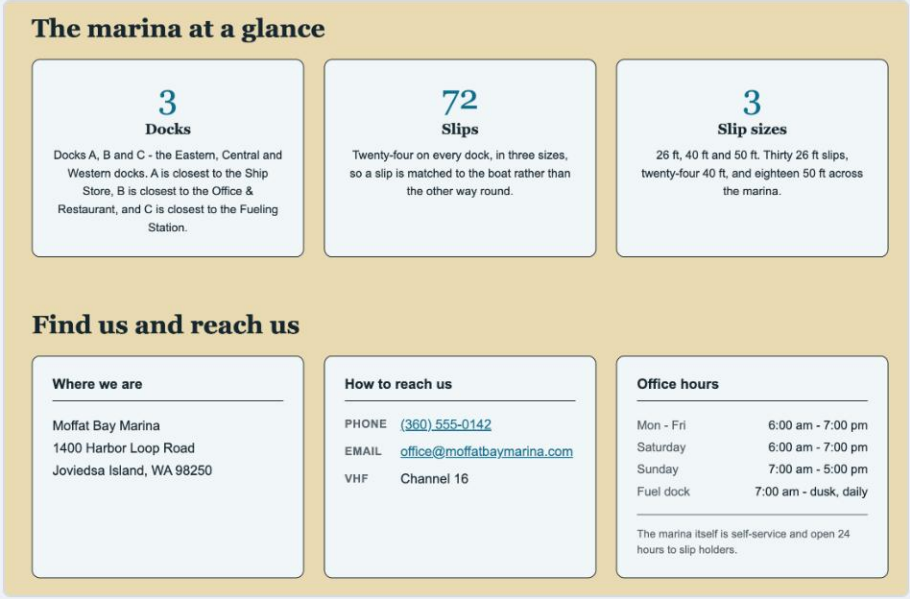

Step	Action	Expected Results	Dev Test	Peer Test
2	Verify the header and footer are visible.	All text and headings are readable and properly formatted.	Pass	Fail

Step	Action	Expected Results	Dev Test	Peer Test
3	Verify all images load.	Images display without broken links or distortion.	Pass	Pass

Step	Action	Expected Results	Dev Test	Peer Test
4	Check the page for overlapping or cut-off content.	All sections display correctly with no layout issues.	Pass	Pass

Comments

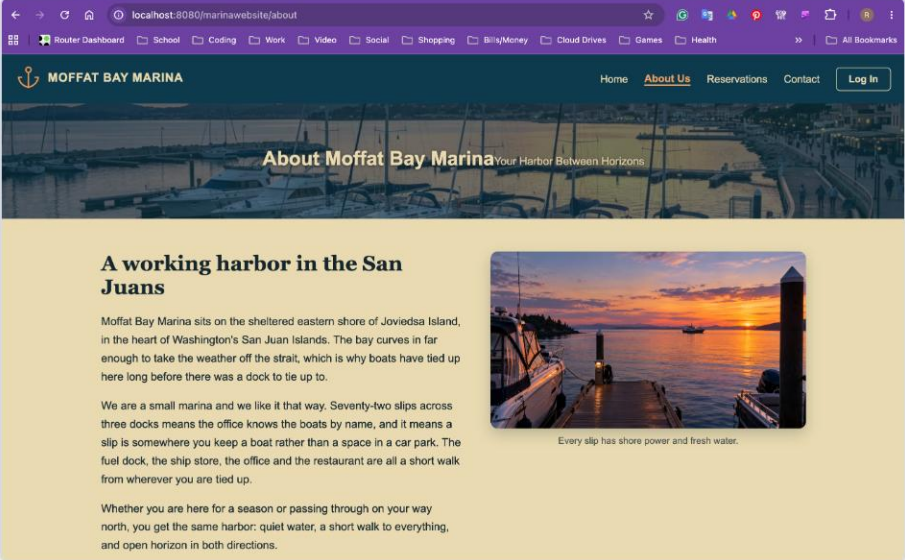

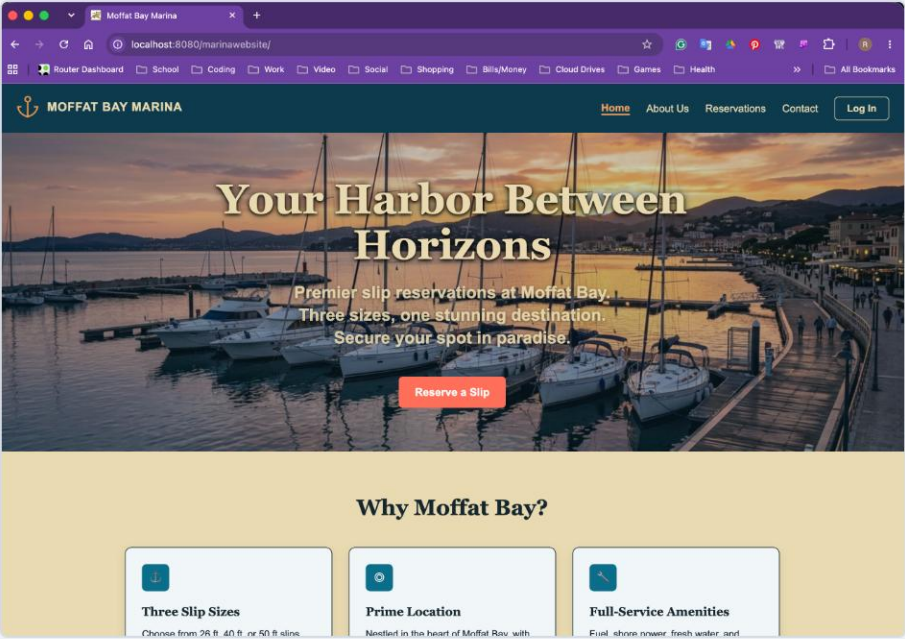

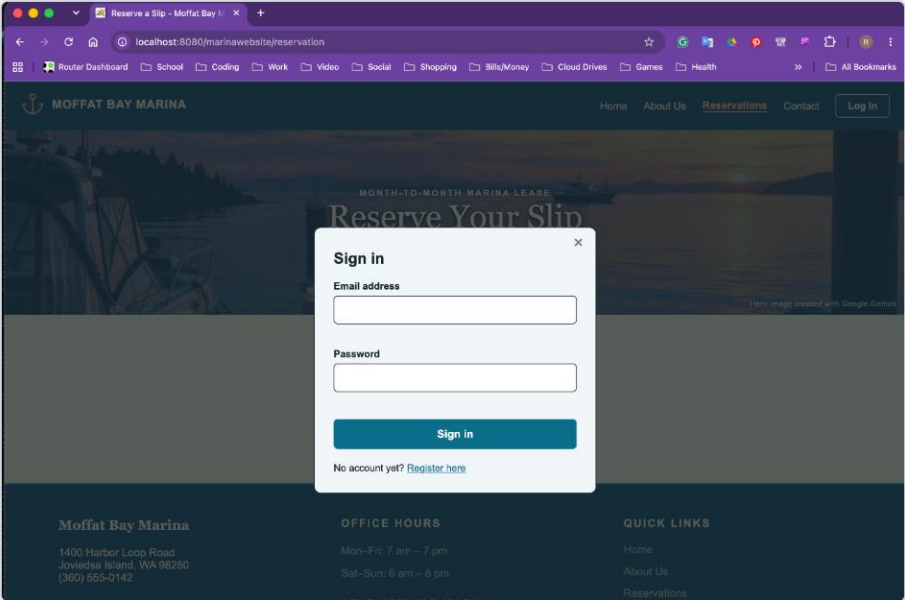

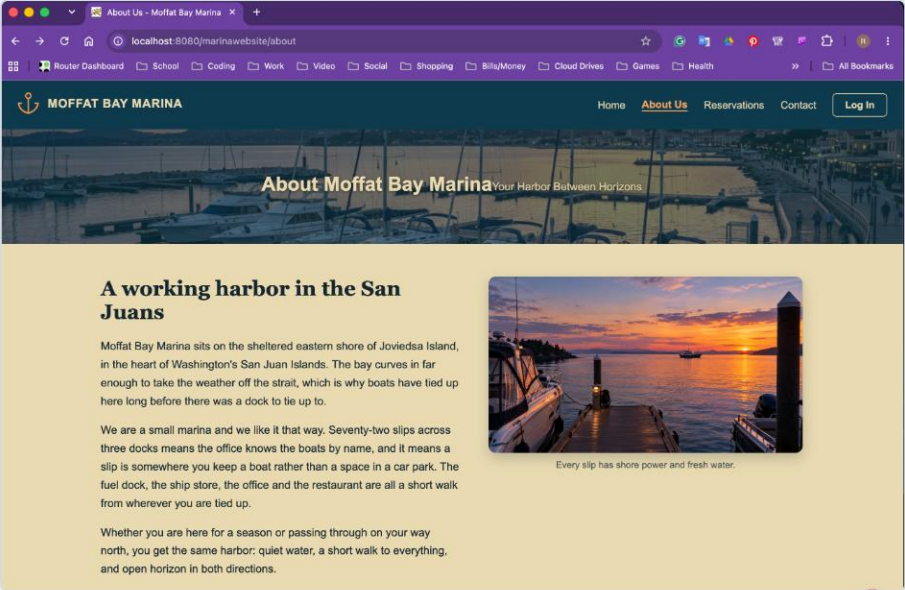

Developer (Carolina) About Us page loaded correctly and all images and page sections displayed as expected during developer testing.
Peer Tester (Robert) The Hero Banner text should be on two lines but shows on one.

Test 2: About Us Navigation

Test Objective: Verify all navigation links on the About Us page work correctly.

DEVELOPER: Carolina Rodriguez | TESTED ON: Sept 11,2026

PEER TESTER: Robert Breutzmann | TESTED ON: 09/12/26

Step	Action	Expected Results	Dev Test	Peer Test
1	Click About Us from the main navigation.	User is taken to the About Us page.	Pass	Pass
				
Step	Action	Expected Results	Dev Test	Peer Test
2	Click the logo/home link.	User is returned to the landing page.	Pass	Pass
				
Step	Action	Expected Results	Dev Test	Peer Test
3	Click another navigation option like Reservation.	Correct page opens.	Pass	Pass
				
Step	Action	Expected Results	Dev Test	Peer Test
4	Use the browser back button.	Return to the About Us page.	Pass	Pass
				

Comments

Developer (Carolina)
All steps passed. The About Us page opened correctly, the logo returned to the landing page, the Reservation navigation opens if signed in, if signed out, asks to sign in, and the browser Back button returned to About Us as expected.

Peer Tester (Robert)
I ran into no issues with this test. When navigating to a "gated" page like Reservation, I was prompted to sign in rather than being allowed to make a reservation without an account, as per the design.

Test 3: About Us Page Has Public Access

Test Objective: Verify the About Us page works for signed out users and displays correctly on different screen sizes.

DEVELOPER: Carolina Rodriguez | TESTED ON: Sept 11,2026

PEER TESTER: Robert Breutzmann | TESTED ON: 09/12/26

1	Sign out of user log in.	Users are signed out successfully.	Pass	Pass

About Moffat Bay MarinaYour Harbor Between Horizons

A working harbor in the San Juans

Moffat Bay Marina sits on the sheltered eastern shore of Joviedsa Island, in the heart of Washington's San Juan Islands. The bay curves in far enough to take the weather off the strait, which is why boats have tied up here long before there was a dock to tie up to.

We are a small marina and we like it that way. Seventy-two slips across three docks means the office knows the boats by name, and it means a slip is somewhere you keep a boat rather than a space in a car park. The fuel dock, the ship store, the office and the restaurant are all a short walk from wherever you are tied up.

Whether you are here for a season or passing through on your way north, you get the same harbor: quiet water, a short walk to everything, and open horizon in both directions.

Every slip has shore power and fresh water.

Step	Action	Expected Results	Dev Test	Peer Test
3	Resize the browser page to half the size of your screen.	Page adjusts without overlapping.	Pass	Pass

The marina at a glance

3Docks

Docks A, B and C - the Eastern, Central and Western docks. A is closest to the Ship Store, B is closest to the Office & Restaurant, and C is closest to the Fueling Station.

72Slips

Twenty-four on every dock, in three sizes, so a slip is matched to the boat rather than the other way round.

Comments

- Developer (Carolina)**

All steps passed. I was able to sign out successfully, access the About Us page without being logged in, resize the browser without overlapping content, and scroll through the full page without information extending off screen.
- Peer Tester (Robert)**

As a part of the testing, I also used the Developer Tools in Chrome to "Simulate" an iPad Air and iPhone 12 Pro screen for step 4. My notes are below.
- Peer Tester (Robert)**

When on a Phone (specifically the iPhone 12) Design, the Header expands to 2 lines. Where as not a bug, this is visually not the way to go. We may want to revisit the responsive design of the menu and have it be a dropdown for the mobile
- Peer Tester (Robert)**

The form fields are a little bit far apart when the screen narrows. The responsive design should probably reduce the gap on the form. Additionally, should probably check additional pages in the site as I believe this is on the shared form-fields site.css .

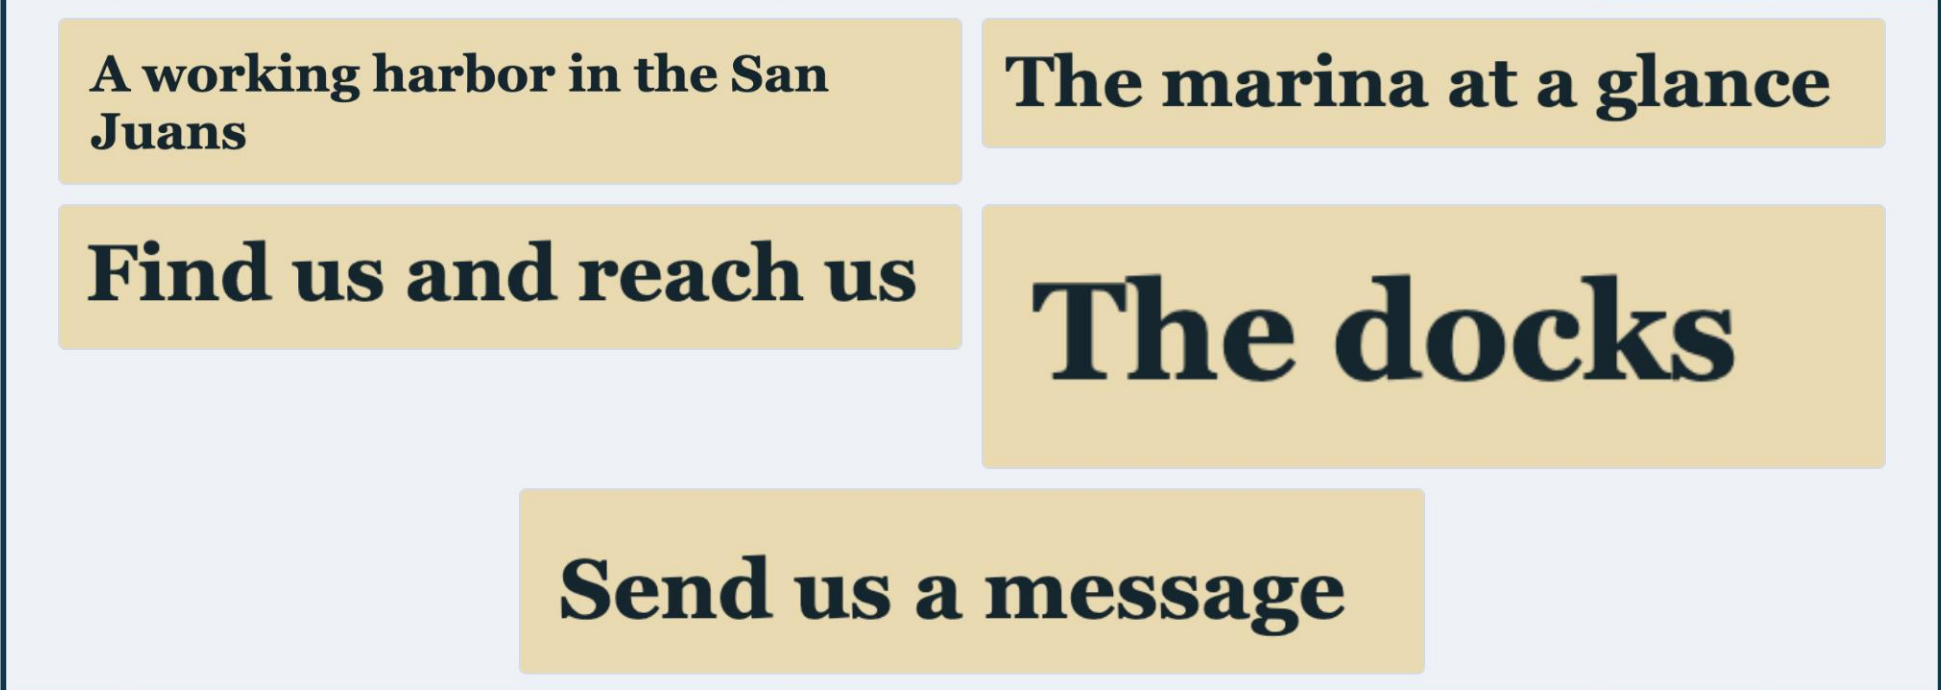

Test 4: About Us Content Accuracy

Test Objective: Verify that the information shown on the About Us page is complete and consistent with the rest of the Moffat Bay Marina website.

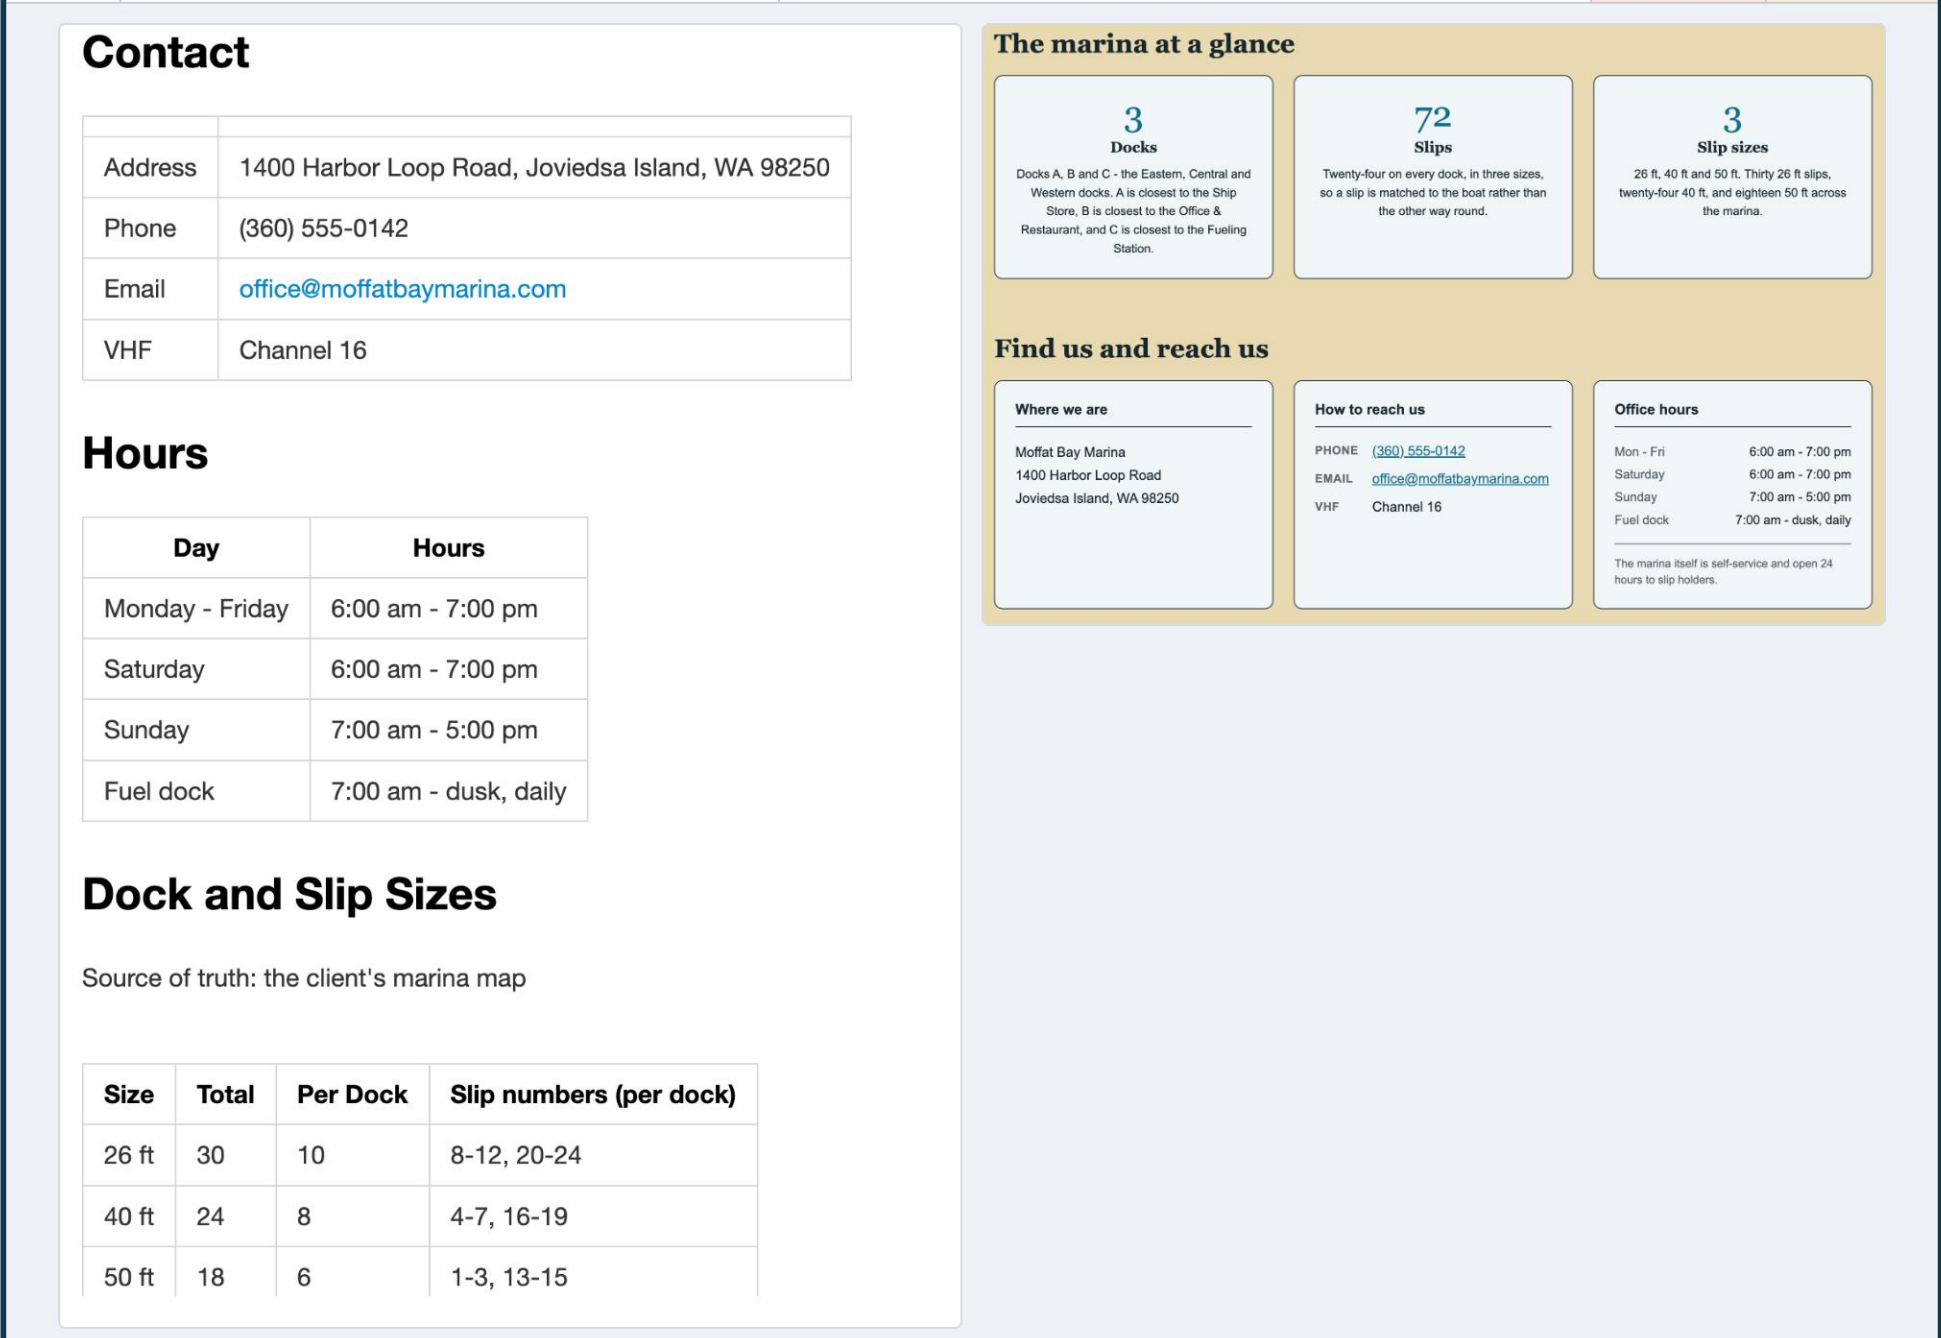

DEVELOPER: Carolina Rodriguez | TESTED ON: Sept 11,2026

PEER TESTER: Robert Breutzmann | TESTED ON: 09/12/26

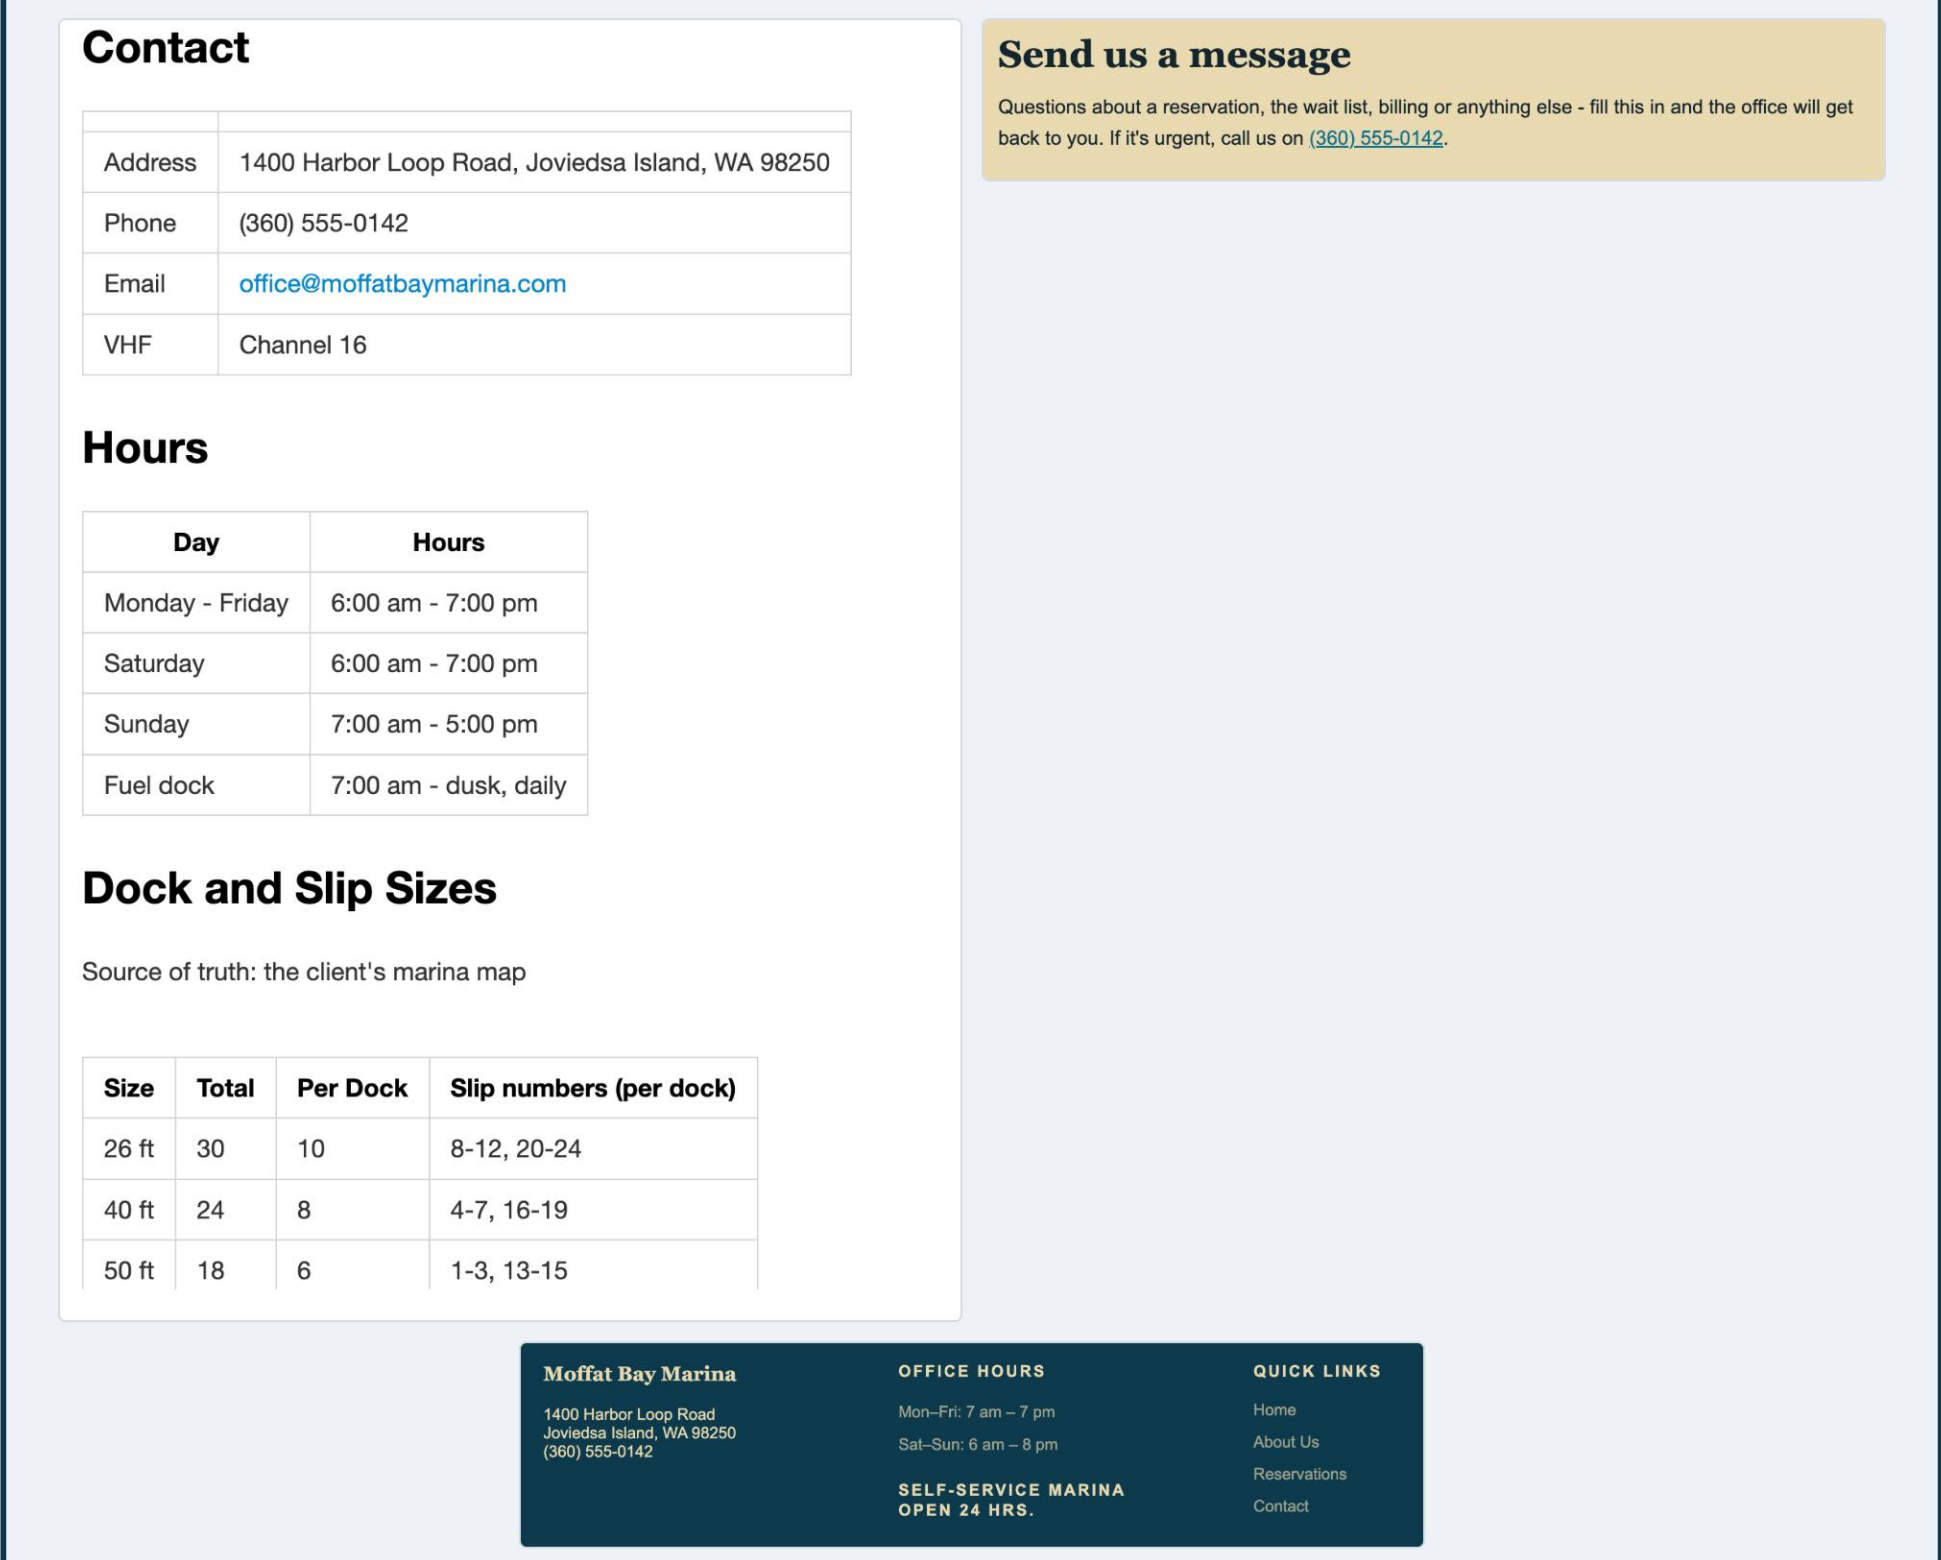

Step	Action	Expected Results	Dev Test	Peer Test
1	Review all headings and paragraph text on the About Us page.	Text is complete, readable, and free of obvious spelling or grammar errors.	Pass	Pass

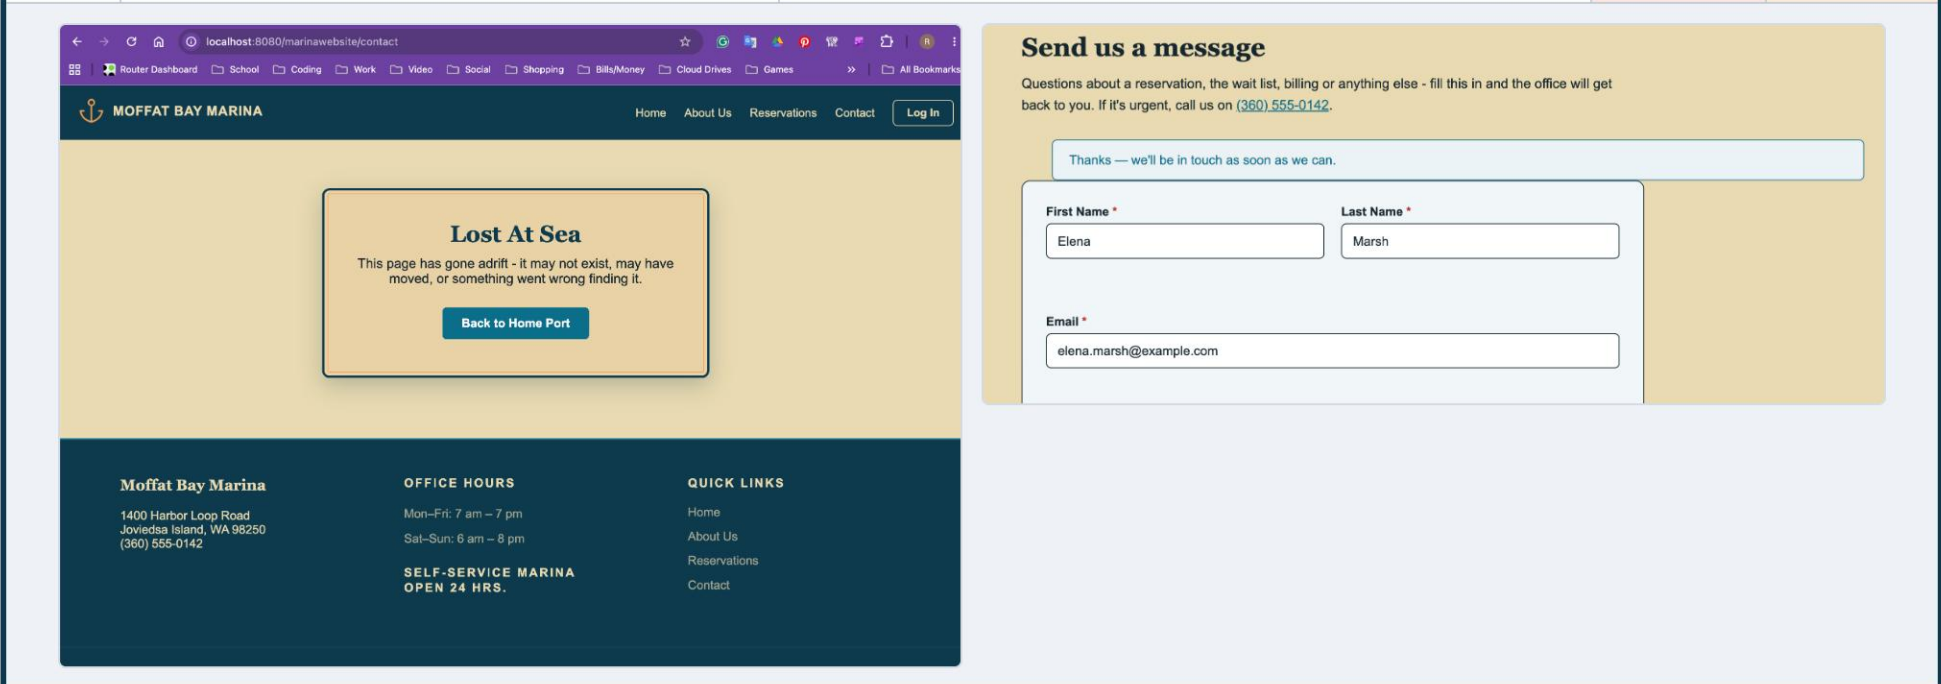

Step	Action	Expected Results	Dev Test	Peer Test
2	Compare marina details with information shown elsewhere on the website.	Names, descriptions, and other shared information are consistent across pages.	Pass	Pass

Step	Action	Expected Results	Dev Test	Peer Test
3	Check any contact information, location details, or marina specific facts shown on the page.	Information matches everywhere.	Pass	Pass

Step	Action	Expected Results	Dev Test	Peer Test
4	Verify any buttons or links included in the page content.	Each button or link points to the correct destination.	Pass	Pass

Comments

Developer (Carolina)
All steps passed. The About Us page content was readable,connects to database, the marina information was consistent with the rest of the website, contact and location details matched, and all buttons and links directed to the correct pages.

Peer Tester (Robert)
Submitting a message through this page does not add it to the database. This is a fatal bug that needs to be fixed before it can be submitted!

Update
This was a database error on the testers part. I had lost the connection to the Database and this was not working.

Peer Tester (Robert)
While trying to fix the submission issue, the success popup comes up directly above the submit form and should use the Message Popup Modal instead.

Additional Notes

Peer Tester (Robert)

The "Send us a message" contact form has too much empty space between its fields, the same spacing issue already flagged for the mobile/narrow-screen form fields in Test 3. Should be corrected.
