

Functional Test - Module 5: Registration

Project: Blue Team — Moffat Bay Marina

Course: CSD 460 - Capstone Project

Description: Test plan for the registration page, covering the live password criteria checklist and account creation in the database.

Date: 2026/09/05

Front End Developer: Robert Breutzmann

Back End Developer: Carolina Rodriguez

Developer Tester: Sara White

Peer Tester: Miguel Fernandez

To complete the test case plan, fill out the information for Project, Course, Description and Date in the header above.

About this document

These tests were originally written and performed by Sara White (developer) and Miguel Fernandez (peer tester) for the Module 5 test plan (Module-5/BlueTeam_Mod5_TestPlan.docx , Tests 3, 4). They were re-formatted into this layout by Claude. The steps, results, dates, comments, and screenshots are carried over from the original unchanged; the original recorded each result as Yes or No, shown here as Pass or Fail. The tests were not re-run.

Table of Contents

- [Cover Page](#)
- [Test 1: Registration](#)
- [Test 2: Registration](#)

For each test, the developer should: provide a test description, a test objective, the developer name and date tested. For each step, fill out the actions to be taken and describe the expected results, and check Pass or Fail. The peer tester should provide their name, date tested, check Pass or Fail for each step, and fill out the Screenshots list below the table with the matching screenshot number for each item.

Test 2: Registration

Test Objective: Verifies account creation on registration page successfully creates database records

DEVELOPER: Sara White | TESTED ON: Sept 5, 2026

PEER TESTER: Miguel Fernandez | TESTED ON: Sept 6, 2026

Step	Action	Expected Results	Dev Test	Peer Test
1	Open a browser and navigate to <code>http://localhost:8080/marinawebsite/registration.jsp</code> Or <code>http://localhost:8081/marinawebsite/registration.jsp</code>	The account registration page should load with three cards (personal information, boat information, and user information) containing input fields	Pass	Pass

Developer (Sara)

Step	Action	Expected Results	Dev Test	Peer Test
2	In the personal information section, enter your first and last name (or a name of your choosing)	Input fields should hold information typed in by user	Pass	Pass

Developer (Sara)

Step	Action	Expected Results	Dev Test	Peer Test
3	In the phone field, 555-555-5555	"Phone number needs all 10 digits" message should disappear after entering full phone number. The field should contain the typed information.	Pass	Pass

Developer (Sara)

Step	Action	Expected Results	Dev Test	Peer Test
4	Select "United States" from the country drop down	Drop down should display "Canada", "United States" and "Other" as three options. After selecting "United States", that selection should remain in the country field	Pass	Not recorded

Developer (Sara)

Step	Action	Expected Results	Dev Test	Peer Test
5	In the Street Address Line field, enter: 123 ABC Drive And for the city, enter: Bellevue		Pass	Not recorded

Developer (Sara)

Step	Action	Expected Results	Dev Test	Peer Test
6	Select Nebraska from the state dropdown menu	Dropdown menu should display 50 states. After selecting "Nebraska", that selection should remain in the state field	Pass	Pass

Developer (Sara)

Step	Action	Expected Results	Dev Test	Peer Test
7	Enter 55555 for the zip code field	Zip code field should contain the entered zip code and message below stating "Enter a 5-digit ZIP, or ZIP +4 like 12345-6789" should disappear	Pass	Pass

Developer (Sara)

Step	Action	Expected Results	Dev Test	Peer Test
8	For the boat information section, enter the following: boat name: "Boatzilla" boat length: 30 HIN: ABC1234DEF67 Enter "NE 1234 AB" for the registration number	Message below the field stating "Registration Number should be a 2-letter state code, 4 to 7 digits, then AB" should disappear	Pass	Pass

Developer (Sara)

Step	Action	Expected Results	Dev Test	Peer Test
9	In the user information section use the following: Email: emailuser@email.com Password: abc123DEF456!	After entering information, the "create account" button should appear bolder and now be clickable	Pass	Pass

Developer (Sara)

Peer tester (Miguel) - Test 4, Steps 2 to 9 - The completed registration form. All password rules are met and Create Account is active.

Step	Action	Expected Results	Dev Test	Peer Test
10	Click the "create account" button		Pass	Pass

Developer (Sara) - After clicking create account, here is the redirect:

Peer tester (Miguel) - Test 4, Step 10 - After clicking Create Account, the browser redirects to /?registered=true. Note there is no on-page confirmation message.

Step	Action	Expected Results	Dev Test	Peer Test
11	Confirm creation of a customer record with the following MySQL statements: USE MoffatBayMarinaDB; SELECT * FROM Customer WHERE email = "emailuser@email.com";		Pass	Pass

Developer (Sara)

Step	Action	Expected Results	Dev Test	Peer Test
12	Confirm creation of a boat record with the following MySQL statements: USE MoffatBayMarinaDB; SELECT * FROM Boat WHERE boatName = "Boatzilla";		Pass	Pass

Developer (Sara)

Peer tester (Miguel) - Test 4, Steps 11 and 12 - Database verification. The Customer and Boat rows were both created, and the extra BoatOwnership query confirms the two are linked.

Step	Action	Expected Results	Dev Test	Peer Test
12	Confirm creation of a boat record with the following MySQL statements: USE MoffatBayMarinaDB; SELECT * FROM Boat WHERE boatName = "Boatzilla";		Pass	Pass

Developer (Sara)

Comments

Developer (Sara)

everything worked well. The fields were easy to navigate and everything was really easy to read. The only major issue I noticed is that after creating the account, it redirects you to the main page, but there's no clear indication the account was successfully created. I think a simple message stating : "success! Your account has been created." Or something along those lines would be useful.

Peer Tester (Miguel)

Confirmed, with three notes. First, I also filled the optional Boat Type and Boat Beam fields, which these steps leave blank - both saved correctly. Second, the registration number was accepted as NE1234AB with no spaces, so the field tolerates either format. Third, I ran one check beyond the written steps: SELECT * FROM BoatOwnership WHERE customerID = 53 returned a row linking the new customer to the new boat with today's start date and a null end date. That confirms registration writes all three tables, not just Customer and Boat. I also saw the same missing confirmation Sara flagged - the redirect lands on /?registered=true but nothing on the page tells the user the account was created.
